PROFILE

Final-year Software Engineering undergraduate with hands-on experience building web, mobile and desktop applications through solo projects. Strong foundation in Java, SQL, relational database design and object-oriented programming, with practical experience in validation, testing and project documentation. Currently developing Python skills and interested in backend systems, data-driven applications and learning new technologies. Seeking an internship to contribute to practical software solutions while developing professional engineering skills.

EDUCATION

BSc (Hons) in Software Engineering - Final Year Top-up 2026
Birmingham City University
Progressed to final year via Java Institute for Advanced Technology

Graduate Diploma in Software Engineering 2022 – 2026
Java Institute for Advanced Technology

BSc (Hons) in Psychology 2023 – Present
Open University of Sri Lanka

Advanced Level 2021
Kingswood College, Kandy
- Art Stream: B, C, S
- English: A

SKILLS

Programming Languages
Java (primary); Python (currently learning through a spreadsheet analyser project). Previous project use: JavaScript and PHP.

SQL & Relational Databases
SQL, MySQL, PostgreSQL; joins, queries, constraints, normalization and relational schema design.

Backend Technologies
Servlets, Hibernate

Programming & Software Practices
Object-oriented programming, MVC, CRUD operations, validation, session management, role-based access, testing, debugging and project documentation.

Frontend
HTML, CSS

Tools & Frameworks
Git, GitHub, JasperReports, Swing; Linux basics (currently learning).

PROJECTS

Beverage Store Web Application
Solo project | Java, Servlets, Hibernate, MySQL
- Developed a database-driven e-commerce application using Java and MVC architecture.
- Designed relational tables for users, products and orders, with Hibernate ORM for persistence.
- Implemented session-based authentication, role-based access and shopping-cart workflows.
- Used Git for version control while developing the application.

Pharmacy Management System
Solo project | Java, Swing, MySQL, JasperReports
- Built a Java desktop application for medicines, suppliers, customer orders and invoicing.
- Implemented CRUD operations and MySQL-backed records for medicine and supplier management.
- Generated invoices and business reports using JasperReports; added low-stock notifications.
- Translated project requirements into application workflows and supporting documentation.

Spreadsheet Analyser (In Progress)
Python | Learning project
- Developing a spreadsheet analyser as a practical project while learning Python.

ApparelFlow: Cutting Verification & Sewing Queue Gate
Solo project, AI-assisted | PostgreSQL, Next.js, TypeScript, Vitest
- Built a garment-manufacturing workflow module as a solo project with Claude as an AI mentor.
- Implemented role-based access and server-side checks preventing incomplete batches from entering the sewing queue.
- Used PostgreSQL constraints, transactions, row locks and an audit-log trigger to support data integrity.
- Tested route handlers and API behaviour for role restrictions, invalid states and tampered inputs.

Travel Agency Management System (In Progress)
Solo project, in progress | Laravel, PHP, MySQL, Blade
- Developing a travel-agency management application with Laravel and a normalized MySQL schema.
- Modelled many-to-many package and destination relationships and a country reference table.
- Implemented customer CRUD operations with server-side validation and input retention on errors.
- Used decimal types for monetary values and foreign-key deletion rules to preserve business records.

CERTIFICATES

Level 5 Professional Higher Diploma in Software Engineering
Skills and Education Group Awards (UK Awards accredited)

Level 4 Professional Higher Diploma in Software Engineering
Skills and Education Group Awards (UK Awards accredited)
